Fast Email Extractor

FEDE is a high-performance software for sending personalized HTML email to the large group of recipients, opt-in email marketing can management , email announcement lists and newsletters . The offered feature set is the most comprehensive and still simple version of leading email marketing software. It supports all forms of email customization , graphics and sound , works with the data through ODBC more. Based on the latest Microsoft .Net Framework technologies it offers a great speed and stability.

Visual Web Task

- **Send Fast.** The speed of sending is the fastest on the market and limited only by speed of your network and by hardware on computer, so please download the product to evaluate. Includes a high speed sending engine that uses up to 300 connections simultaneously allowing incredible sending speeds.

- **Flash Animation movies** can be embedded in your email message. Unlike other email sending products our tool gives you the ability to send Flash movies not as referenced file but embedded inside the message itself. So your message will deliver a high quality content and video.

Sending Bulk Email

- **High Personalization.** The tool allows you to send highly customized messages including personalized message bodies and footer subject lines for each of your recipients. If you already have a list of customers in some files like Excel or other database you can use all the data and personalize the messages exactly as you want. Advanced users can use ASP or VBScript to create email reports providing you the most flexible solution on the market.

Office

Fast Email Verifier

- **Powerful List Management.** Manage an unlimited number of groups/lists with an unlimited number of recipients in each. We can remove duplicates and perform many other operations.

AntiExtractor

- **Make Rich Colorful HTML** Messages. Now finally your messages will jump off the screen with rich HTML content! Our products include any graphics, fonts and colors turning your messages into professional online brochures.
- **Database Abilities.** If You have large list of customers in some database like MS Access or SQL server You can send the messages from there marking every record after sending. Each message can be personalized using the database data.
- **File Attachment** . Send attached files, documents, coupons, or whatever else with your messages and as many as you need.
- **No Need in SMTP server.** E-Delivery Engine is a powerful group mailer which sends your message directly from your PC to the server without using any ISP's relay SMTP server. Any ISP provider has the restrictions on number of sending emails and E-Delivery solves all these problems. It gives instant confirmation of delivery by checking the address before it sent, which at 80% eliminates undeliverable" messages you can get.
